STEIN-REX® 2.0 and Indu-Rex®

THE INNOVATION FOR GARDENING AND LANDSCAPE GARDENING

How can the daily challenges in horticulture and landscaping be mastered more efficiently and easily? How can processes be simplified? We asked ourselves these questions when we developed the Outdoor-Rex® and answered them with this innovative positioning device and mini crane. The gardening and landscaping industry is facing a multitude of challenges. Increasing costs and higher demands on biodiversity and environmental protection must be mastered and implemented. The Outdoor-Rex® offers you the opportunity to work faster and more economically as well as more flexibly and with less impact on the terrain. Always with the individual needs of employees and companies in focus, we have further developed our innovative STEIN-REX® 2.0 for landscaping with expertise, years of industry knowledge and a great deal of passion. The result: the Outdoor-Rex®. User-friendly. Safe. Economical. Landscaping shapes our cityscapes and landscapes. It's time it received the support it deserves.

Simply better.
**OUTDOOR-
REX®**

The innovative paver for landscaping.

WORK MORE EASILY THAN EVER BEFORE.

Move and place heavy loads such as paving stones or concrete blocks with ease. Reach inaccessible terrain with no problems. Work efficiently at different heights and terrace levels. With the Outdoor-Rex®, you have a partner at your side who supports you effectively with lifting and moving paving stones and concrete blocks in gardening and landscaping and takes the burden off

your employees. Your advantage: You save time and manpower whilst increasing productivity and efficiency. Thanks to its intelligent design, the small crane with telescopic column and multiple articulated boom is ideal when working in confined spaces. The Outdoor-Rex® – your crane for garden and landscaping construction.

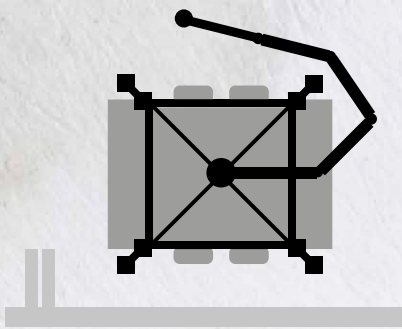

YOUR ADVANTAGES

HOW THE OUTDOOR-REX® MAKES YOUR WORK EASIER

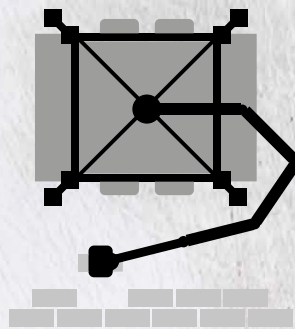

- > Can be used in the tightest of spaces and in front of existing obstacles such as walls or hedges
- > Smooth stone movement thanks to the multiple articulated boom and central ballast
- > 1-person operation: With the appropriate attachments, kerbstones, garden slabs, natural wall stones, patio slabs or steps can be moved and laid easily and with just one person
- > Operating radius of 5 m: Large areas can be worked on with only one standing position
- > Effortless positioning of weights from 300 – 400 kg
- > No dangerous area due to swinging ballast
- > Adaptation to all conditions
- > Stable even in windy conditions due to small contact surface
- > Adjustable hook height

THE OUTDOOR-REX® IN ACTION

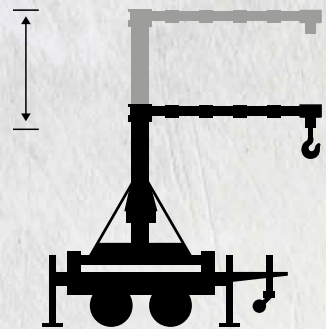

Easy to use

Precise positioning

Flexible height adjustment

The Outdoor-Rex® can flexibly reach, work and cover long distances around existing obstacles such as trees, bushes or walls. The Outdoor-Rex® can be moved easily thanks to its fixed connection to the trailer.

With the Outdoor-Rex® you can position weights of 300 – 400 kg effortlessly on the spot. Absolutely precise: you can position and place even large-format paving stones with pinpoint accuracy.

With the Outdoor-Rex® you can easily work on different levels and terrace steps. The Outdoor-Rex® offers you the opportunity to take full advantage of the multiple articulated boom even on uneven and unpaved surfaces. Differences in gradients of up to 5 % can be compensated quickly and easily.

TRADE ASSOCIATION REGULATION:

Setting tool mandatory for stone weights of 25 kg or more.

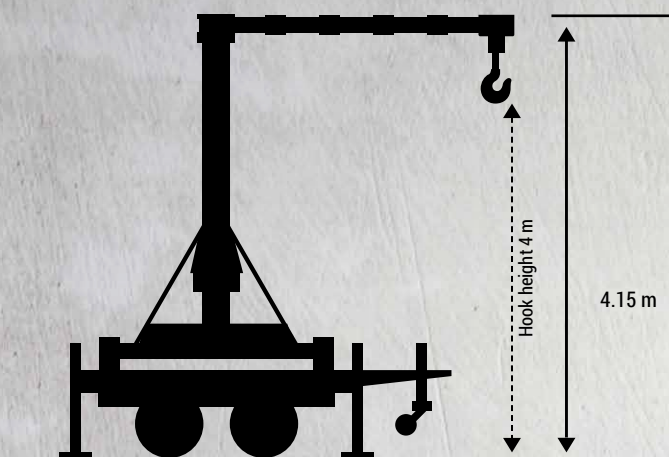

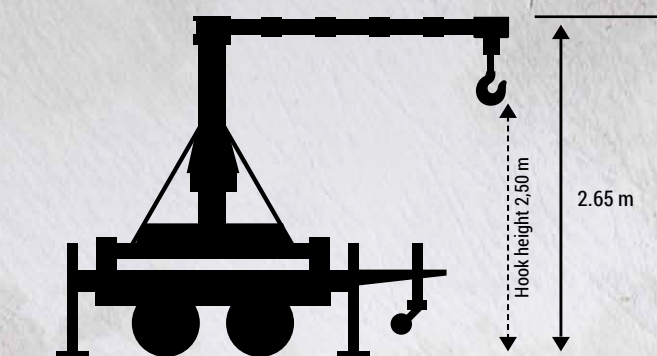

Future prognosis: Reduction of the limit to 15 kg.

DIMENSIONS OF THE OUTDOOR-REX®

WORK FLEXIBLY AND TERRAIN-FRIENDLY

HEIGHT-ADJUSTABLE
AND TELESCOPIC

QUALITY THROUGH AND THROUGH

The Outdoor-Rex® is fully galvanized, so there is no risk of rust. All components comply with the VDE test guidelines, DIN regulations and European standards. CE marking, documentation and test book are available.

TECHNICAL DATA

Transport dimensions:	Length of the trailer: 4.5 m
	Width: 2.35 m Height: 2.95 m
Load capacity:	300 kg (400 kg with articulated arm folded in)
Hook height:	4.2 m adjustable via hydraulic column
Total weight:	2.100 kg (incl. ballast weights)
Total weight of trailer:	Tandem trailer with permissible total mass of 3500 kg Trailer tare weight: approx. 465 kg
Outreach:	5 m / 4.3 m

SIMPLY BETTER.

WHAT MAKES THE OUTDOOR-REX® SPECIAL

✓ ABSOLUTE REDUCTION IN WORKLOAD

Do you want to effectively reduce your employees' workload and save manpower? The answer is Outdoor-Rex®. Lifting large planters, setting paving stones and kerbstones as well as garden walls, steps and patio tiles is made considerably easier. Thanks to the flexible control of the Outdoor-Rex®, precise placement and setting of stones on raised terraces or the positioning of heavy sculptures, garden fences or decorations is made possible.

✓ SIMPLY FASTER AND MORE EFFICIENT

It doesn't get any faster: With the Outdoor-Rex® you can work faster and complete various tasks, such as laying paving stones or bricks, much more efficiently.

✓ SAFE AND TERRAIN-FRIENDLY

Due to its compact design and transport method, the Outdoor-Rex® is gentle on the surrounding terrain as it causes less damage than larger construction machines. This is an advantage in sensitive environments such as gardens or landscaped areas. It can also be used on paved areas that have not been cleared.

✓ CORROSION RESISTANT BOOM

Not only the telescopic column of the Outdoor-Rex® is high-temperature galvanized, but also the multiple articulated boom, which prevents it from rusting and makes it more durable. The Outdoor-Rex® also has a hot-dip galvanized base frame.

✓ SLOPE COMPENSATION UP TO 5%

No difficulties with height differences in the terrain: inclines of up to 5% can be effortlessly compensated by the integrated heavy-duty supports.

✓ OPTIMIZED CONTROL SYSTEM

The Outdoor-Rex® is equipped with a 230 V PLC control system with integrated frequency converter. While the chain hoist is easy to operate thanks to the soft start-up and two lifting speeds, the integrated bubble levels facilitate precise alignment. The innovative hydraulic column can be extended by 1500 mm using the remote control. The radio remote control and radio bracket are used to adapt it to the load handling attachment. The cable control is also available as a replacement control.

230 V connection
for attachments
with spiral cable

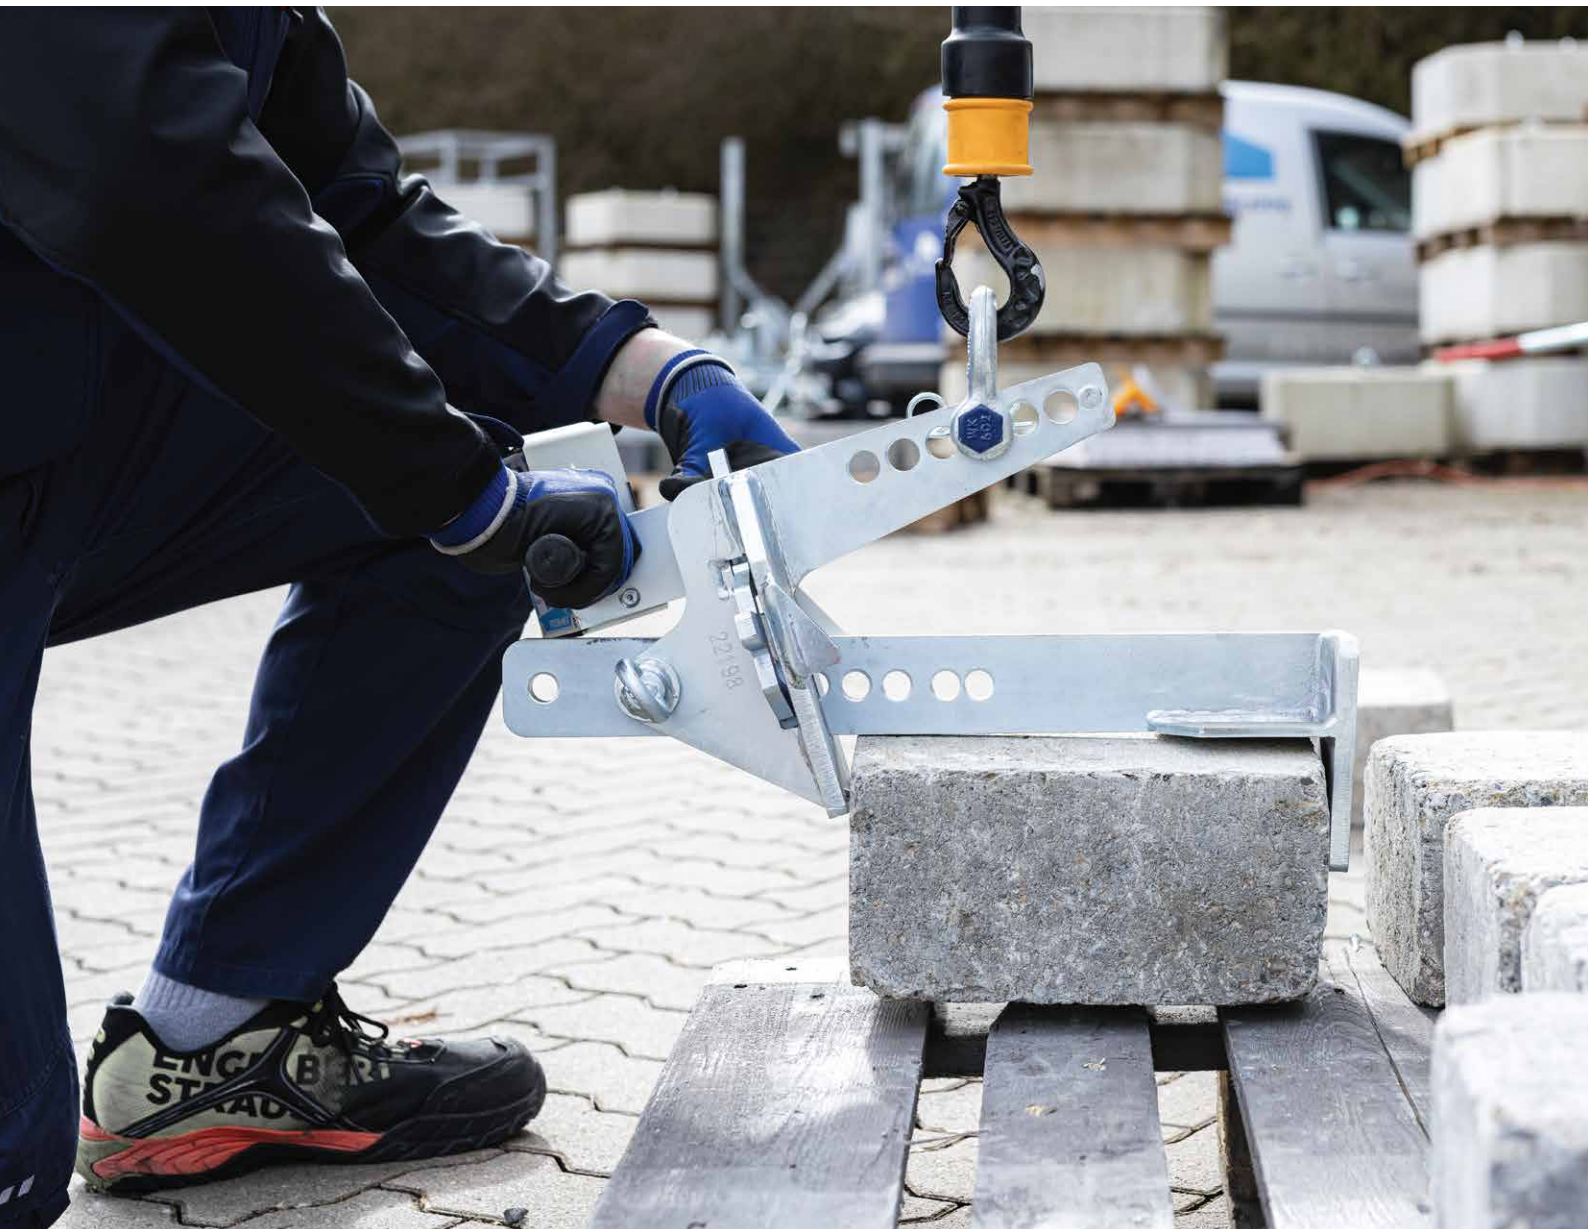

THE RIGHT ACCESSORY FOR EVERY APPLICATION

What task do you want to solve effectively? The Outdoor-Rex® is ready for any challenge. Thanks to the wide range of grabs and pick-up systems, kerbstones, garden slabs, natural wall stones, patio slabs or steps can be easily moved and laid. Your advantage: The entire process can be carried out by a single person.

Thanks to our innovative adapter, the Outdoor-Rex® remote control can be easily attached to the corresponding load handling attach-

ment, which is then ready for use with the Outdoor-Rex®. This means you have a wide range of lifting systems at your disposal! We also offer you a spiral cable to provide a 240 V Schuko socket in the area of the crane hook, to which other devices with a wide variety of attachments can be connected.

We and our partners will be happy to advise you on all the options for mounting systems for the Outdoor-Rex®.

INSIGHT INTO THE MOUNTING SYSTEMS

✓ SPEEDY POWER-RACK VS-PR (FABR. PROBST)

- > Suction plate in various designs for lifting and moving large-format stone tiles and stone slabs.

✓ ANGELED SUCTION PLATES (FABR. PROBST)

- > Easy lifting and moving of concrete blocks with the 3-fold suction plate.

✓ EASYGRIP EXG BORDER STONE HANDLE (FABR. PROBST)

- > Mechanical gripper for gripping parallel, flat and non-tapered concrete elements such as block steps or kerbstones.

✓ STONE GRAB RAPTOR Q

- > In-house cross grab from Schulte Transportsysteme, specially developed for versatile moving of stones up to 400 kg.

SPARE PARTS AND SERVICE DIRECTLY FROM THE MANUFACTURER

✓ FAST SPARE PARTS SUPPLY

When it comes to spare parts supply, two factors are particularly important: Speed and quality. At Schulte Transportsysteme you can rely on both. All spare parts are immediately available from stock. This means you lose no time and can continue working with your Outdoor-Rex® straight away. To make things even easier for you, the spare parts can be ordered pre-assembled in modules. This significantly reduces the time and effort required for assembly.

✓ DELIVERY, INSPECTION AND MAINTENANCE

Is your Outdoor-Rex® a little older? We have spare parts for all models of the mini crane. Our portfolio also includes refurbished spare parts. You will only receive products of the highest quality - directly from the manufacturer.

✓ INSTRUCTION AND TRAINING

So that you can start using your Outdoor-Rex® immediately, our experts will carefully instruct you in its operation. On request, we can also provide you with detailed training on how our machines work.

✓ TECHNICAL ADVICE BY TELEPHONE

Questions and concerns about our Outdoor-Rex® can often be clarified over the phone. Our competent technical advice is at your disposal.
